

\$HEMI Tokenomics

The Role of the Hemi Token

\$HEMI is the token that powers network coordination, staking, security, and cross-chain settlement across the Hemi ecosystem. This marks a major step forward in the network's development and long-term sustainability.

Initial Circulating Supply:
10 Billion \$HEMI

Yearly Emissions:
3-7%

\$HEMI Token Utility

- Network Transaction Fees
- Incentivizing Bitcoin Security Inheritance via PoP
- Chain Payment in \$HEMI for PoP Security Aggregation
- Staking \$HEMI in veHEMI System to Participate in:
 - Governance and Ecosystem Decision-making
 - Decentralized Sequencing
 - Decentralized ETH Publishing (DA + State)
- Bitcoin Tunnel hBitVM Covenant Emulation
- Liquidity Provisioning for Tunnel System
- Future Decentralized Protocols Requiring Collateralization
- Bootstrapping Ecosystem Adoption (Grants, LP, Developer Incentives)

Token Allocation

| Category | % Tokens | # Tokens |
|--------------------------------|---------------|-----------------------|
| Community & Ecosystem | 32.0% | 3,200,000,000 |
| Hemispheres Foundation | 15.0% | 1,500,000,000 |
| Investors & Strategic Partners | 28.0% | 2,800,000,000 |
| Team & Core Contributors | 25.0% | 2,500,000,000 |
| Total | 100.0% | 10,000,000,000 |
